alphabiol®

Collagen + Hyaluronic acid

sevenfold anti-aging formula

Bioactive collagen peptides + hyaluronic acid + ALP PHYTO
+ Zinc + Antioxidants + Lycopene + Biotin

DEVELOPED BY SCIENTISTS

Timeless beauty from inside

We want to sparkle from the inside, to be naturally beautiful and accepted. We all want to feel comfortable in our own skin and show it on the outside. Unfortunately, the natural aging process starts as early as the age of 25: wrinkles are starting to show.

While the active ingredients of cremes and lotions are often only able to penetrate the upper skin layers, a special concept for care and maintenance from the inside is pursued with **alphabiol Kollagen + Hyaluronsäure** – with its sevenfold anti-aging formula.

alphabiol Kollagen + Hyaluronsäure is a beauty drink whose effect has been proved scientifically and that lets your skin radiate from the inside – based on exclusively combined micronutrients.

TIMELESS
BEAUTY
FROM INSIDE

High-quality ingredients in a unique combination: sevenfold anti-aging formula

Collagen and hyaluronic acid are decisive factors where the moisture content of the skin and its firmness are concerned. **alphabiol Kollagen + Hyaluronsäure** combines these two essential substances with other important nutrients for hair, skin and nails. Another important component is Alp Phyto, a unique alpine herb extract developed in the Swiss Alps on the basis of bio-certified plants.

The product was developed by renowned scientists based on many years' expertise in the field of innovative, premium liquid dietary supplements.

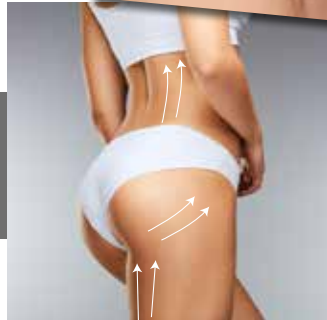

Scientifically proven: the collagen-peptides effect

It was possible to show in clinical studies¹ that bioactive collagen peptides have led to a reduction in wrinkle depth² and an improvement in skin elasticity³. In combination with micronutrients and hyaluronic acid the skin is supplied from the inside with substances that can counteract visible skin aging.

If taken over a longer period, this clearly reduces the signs of skin aging:

- reduction of wrinkle depth²: -20%
- elastin concentration²: + 18%
- improvement in skin elasticity³: + 7%

Recommended intake

1. One vial daily – preferably in the evening
2. Ideal application period: 6 weeks and longer
3. Intake: straight or with water/fruit juice

1) Carried out at the Christian-Albrechts-Universität, Kiel, Dermatology Department with 114 participants
2) Minimum consumption period: 8 weeks, study with collagen peptides: Proisch E et al.; Skin Pharmacol Physiol 2014; 27: 113-119.
3) Minimum consumption period: 4 weeks, study with collagen peptides: Proisch E et al.; Skin Pharmacol Physiol 2014; 27: 47-55.
